SUMMARY

Computer Science student majoring in Software Engineering, graduating in 2027, seeking a Software Development Internship. Experienced in building and deploying responsive web applications with JavaScript, HTML and CSS, with a foundation in Python, Java, Dart and Flutter. Certified in software engineering, software testing and machine learning through IBM and HKUST on Coursera.

EDUCATION

Manuel S. Enverga University Foundation — Lucena City, Philippines
Bachelor of Science in Computer Science, Major in Software Engineering — *2023 – 2027 (Expected)*

TECHNICAL SKILLS

Programming Languages: JavaScript (ES6+), HTML5, CSS3, Python, Java, C++, Dart
Frameworks and Libraries: Flutter
Databases and Storage: MySQL, Browser localStorage
Developer Tools: Git, GitHub, Visual Studio Code, Vercel, Figma, Claude AI
Concepts: Responsive Web Design, Modular Programming, Software Testing, Deployment and Maintenance, Software Development Life Cycle (SDLC)
Soft Skills: Teamwork, Communication, Problem-Solving, Adaptability, Attention to Detail, Technical Documentation

PROJECTS

RideShareEU: Priority-Scored Greedy Matching Algorithm for University Carpooling — Feb 2026 – Present
Thesis | *Next.js*, *Node.js*, *PostgreSQL*, *Prisma ORM*, *Python*, *Jest*, *Postman*, *Figma*
Source Code: github.com/KlRAAA/rideshare-eu

- Co-developed a full-stack carpooling platform with Next.js and PostgreSQL/Prisma, modeling 8 core relational entities across 8 tracked migrations.
- Designed a two-stage Priority-Scored Greedy Matching Algorithm (PSGA) that filters candidates by route overlap, time window and hard constraints, then ranks them on a weighted composite score.
- Validated PSGA against 3 baseline methods (first-in-first-out, route-only, random) on a 500-row human-labeled dataset, outperforming all baselines at 0.826 Precision@1.

BillCheck: Bill and Installment Tracker — Aug 2026 – Oct 2026
Personal Project | *JavaScript*, *HTML5*, *CSS3*, *localStorage*, *Vercel*
Live Demo: pay-bills-theta.vercel.app | Source Code: github.com/Vonnie09/billcheck

- Developed a responsive web app that splits bills into 2 to 48 installments on weekly, biweekly or monthly schedules.
- Implemented payment confirmation with receipt uploads, undo, a next-payment banner and an overdue bill summary.
- Structured the code into framework-free JavaScript ES modules for state, rendering, user actions, components and views.
- Stored data in localStorage with demo mode, a restorable trash bin and saved dark mode; deployed on Vercel from GitHub.

Money Budgeting: Personal Budgeting Web App — Nov 2026
Personal Project | *JavaScript (ES Modules)*, *HTML5*, *CSS3*, *localStorage*, *Git*, *GitHub*, *Vercel*
Live Demo: money-budgeting.vercel.app | Source Code: github.com/Vonnie09/money-budgeting

- Built a mobile-first budgeting app to track income, expenses, category budgets, bills with due dates and spending charts.
- Designed "Money Lists" with running balances for cash, bank and e-wallet, showing money set aside vs. free to spend.
- Implemented Demo Mode (Small, Medium, Full sample data) and an Empty State mode, each with its own localStorage data.
- Added custom categories, light/dark themes, swipe-to-close sheets, accessible dialogs and live amount formatting.

CERTIFICATIONS

Software Testing, Deployment, and Maintenance Strategies – IBM, Coursera — Jun 2026
Machine Learning with Python – HKUST, Coursera — Apr 2026
Software Engineering Specialization – IBM, Coursera — Apr 2026
Software Engineering: Implementation and Testing – HKUST, Coursera — Mar 2026
Flutter and Dart: Developing iOS, Android, and Mobile Apps – IBM, Coursera — May 2025
